

BUILD YOUR OWN AUBURN MODEL 851 SPEEDSTER SHADOWBOX

Glue or tape plane to
inside of Floor Panel

Floor Panel

The Auburn Speedster was
manufactured by Auburn
Automobile Company, of
Auburn, Indiana.
Arguably the best-known
speedster of its era, the
Speedster 851 had a
4.5-liter straight engine, super-
charged and designed to
be water-cooled by
in-line flathead side-valves.
